RE: RCPCH report

November 11, 2016 at 6:32 pm GMT

To: BREAREY, Stephen (COUNTESS OF CHESTER HOSPITAL NHS FOUNDATION TRUST)

Many thanks Steve for that – it can sometimes be difficult to pull all the bits together remotely hence the accuracy check. We'll include those things in the final report together with anything else that Ian sends through. Hope very much that you found the process helpful and constructive. Have a good weekend
Sue

Hi Sue,

I've read a redacted version of the draft report yesterday and given feedback to Ian Harvey with some points I'm sure he will contact you about. There were a few points that I needed to go back and check today. I have included these in the email below, in case you wanted to act on anything in the meantime.
Thanks again for all your work.

Best wishes,

Steve

Dear Ian,

Thank you for allowing us time to go through the report yesterday.

1. I can confirm that Debbie Peacock, risk facilitator, did attend the thematic review meeting on 8th Feb, and her attendance was recorded in the minutes.
2. Regarding term admissions, I will forward you the email I sent to Sue Eardley on 13th October. The activity, capacity and demand network report for 2015-2016 shows that the percentage of live births > 37 weeks admitted to NNU was 7.8%. Although I accept this is still above the national average, it is less than Ormskirk and Warrington hospitals in our region (9.2% and 9.0%) and shows we are improving. **This data was available in October and is more relevant to the times the review looked at and therefore it would be better if they quoted this data.**
3. Regarding the comment on neonatal guidelines, I would be very grateful if you highlight to the RCPCH that the following guidelines all reference LWH or Arrowe park guidelines:

Central Venous Lines Umbilical Venous Catheter UVC and Peripheral Long Line Insertion
Insertion and sampling from umbilical arterial lines (uac) and peripheral arterial lines
Renal tract abnormalities – postnatal management Neonatology and Paediatrics
Candida Infection (Neonatal)
Parenteral nutrition and electrolyte disturbance-Neonatal
DRUG INFUSIONS IN NEONATES - PRESCRIBING & ADMINISTERING
PNEUMOTHORAX AND CHEST DRAIN INSERTION IN NEONATES
RESPIRATORY FAILURE IN NEONATES MANAGEMENT PATHWAY

In addition, the following guidelines have been taken from LWH guidance:

Hepatitis B infection
Hepatitis C Infection
Neonatal encephalopathy
Neonatal hypoglycaemia
Elective intubation and the use of sedation and paralysis
DRUG INFUSIONS IN NEONATES - PRESCRIBING & ADMINISTERING
Surfactant guideline
Enteral feeding for Very Low birth weight babies < 1500g

There is existing NICE guidance on Jaundice and early neonatal sepsis and therefore NICE is referenced in preference.

Best wishes,

Steve

Hi Steve

Yes, we have had the draft report in. I am going to get Debbie to arrange for Ravi, Ann (in Eirian's absence) and you to meet with me next week to give you the chance to review it before it goes back to the College to be finalised. This is on the College's advice rather than sharing a draft with the whole unit.

Stephen is going to come to your unit meeting on Monday to discuss Babygrow.

Have you had any luck with the QGIS? I have copied you into an email to them – they have extended the deadline to 18/11.

Regards

Ian

Hi Ian,

Do you have any news on the RCPCH report and when we will be able to see it? We were going to ask yesterday after the MSC but I think we both got called away before the end.

Also, did you manage to speak to Stephen and the Babygrow appeal plans? I've not heard from him.

Best wishes,

Steve
