FYI – in the light of Sarah’s earlier graph, which I have to say wasn’t very well set out, made things look far worse than they are.

I queried with Steve the sharing/joint work with Obs and their previous review and he said:” They will get joined up at the Women and Children’s governance board”.

Regards

Ian

Subject: RE: Neonatal mortality

Hi Ian,

It wasn’t an external review, but we did have a review of all the cases from 2015 to identify any themes or common learning and I did invite an external neonatologist from LWH to join us and contribute, which was very useful.

I have attached the draft minutes and actions from the meeting. I have only circulated it to the attendees so far in case anyone wanted to add any further comments. Once I have feedback from everyone, I’ll circulate it more widely and make sure all the actions are completed.

Best wishes,

Steve

Dear Steve

Am I correct in thinking that you commissioned an external review of recent neonatal deaths? If so, is there any early feedback ahead of this week's visit?

Thanks

Ian
