Outlines from Tc. USHA. RAJ.

Unexplained increase in deaths.

In-depth med. reviews failed to highlight them.

Commissioned compreh. review - ~~where~~

Close to admissions - defined level of care

- model of care to be agreed

Implications:-

Spoke to CQC. - agreed to our actions.

↳ actions proportionate - fair + balance of.

↳ asked Q's. decision making,
staffing, environmental.

IH. Review - medical + nursing.

Timing - urgent. Had to be in 2 wks?

Review can be done in August '16

2 Neonatologists

2 Nurses.

1 Law.

↳ Immediate feedback.

Full report 2/3 wks.

College draft → proposal this PM.

IH. to draft TOR, visits + IUs.

↳ pulling data to feed into review.

Tc keen to go on but qualitv → Proportionate.

Reasonable

↳ Level of care -

Assumed not safe. at present.

Steve B. Went back a step.

Does not matter what level with concerns

about a member of staff!

Can reduce cot. Hour. gestation.

But still not safe bc of staffing.

Saladi. Under pressure.

Shere B. Our culture of reporting is high across the network.
Help inconsistent.

Discuss around table together

Plan: Not Execs v. Clinicians.

Appreciate support from Execs

Plan → pragmatic way forward.

BUT Nurse = suspicious = Police.

Equipment example - incubator to ERMA.

Lorraine Work over next 2 wks. will hopefully give us
more assurance. Someth →

Ak. Noth → now.

Karen Apologise if aggressive / defensive.

Shere B. Apologise if defensive.

Sheff. Support - Dec. Health available.

Duncom. Sweet spot.

Review has to take its course. Say 2 months

May get some glimpses.

Maybe inconclusive - may seem unthinkable.

Shari agreed as discussed

Careful explanation will be needed.

Sheff elsewhere. may include 'Nurse' or not.

Difficult bet. 2 wks (Nurse) & Review (6 wks)

Safety paramount.

Will need help across network.

Mult. side together.

Ty. TC. E-group thro. Plan. & Comms.

+ View when can this happen? Tough call. Personal

Look after each other. One team.

4.17 close.
