

Wed. 27. June. 2016. TC. Ak. H. Dave. S. Steve. B.
 5.10pm. Te-office. Rami. Bladi. LB. SRe
 Ak outline.

Mark is *Sedparick anvre* (Lami)

Steve. B. Some Pms reports but not all. Inconclusive.
 Know not satisfactory giving answers
 Inconsistent DATIX reports.

'Near misses' not a term used by Steve B.

Difficult in Neo-notes.

Unexplained collapses - perhaps shd DATIX

Lot of complexity around reporting - tricky to get oversight.

Ruth sd - look at data in a grid fashion to look
 at all, not just clinical. No kit/beds issues.

Microbiology? nature of neo-natal.

Steve. B. Defined one panic incident/birth

Pseudo-moss growing from legs but not
 incident in incidents.

looked at clinical factors & more (environmental)
 Inconclusive.

Emails → staffing

Steve B. Met July 2015. 3 cases common theme
 was nurse. Discussed at thematic with
 Liverpool & May 2016.

Rami. entirely subjective.

Staff member - almost always Nurse in charge
 Babies were stable & then deteriorated.

Why always this nurse?

Babies were unwell but getting better

Babies not getting oxygen - then crash.

Babies did not respond as they should

Steve. B. Disturbing thing - twin survived
 & got better in Amowwe Park.

Rami's coming back to COCH. Baby's deteriorate

Nurse 7 out of 9 bet 12noon & 4pm
 - vein change none
