

Mon. 4 July 2016. 3pm. TC. Steve B. to Dorian, Joan, Julie F.
Steve B. Spking to Ian & Lorraine. Duncan: Lorraine A.K. SPC
Julie F.

32 wks & above is normal Level 1. - could be 34 wks
(over 32 wks) 30 babies a yr would have to be 'shipped out'

Consensus - Steve B. no strong feeling

Gestations - level 1. above 32. → Julie Maddocks

Lorraine has had conversation with network - comfortable

Work → to Wed. this wk.

to D. no's difficult to judge but likely 2 deliveries per wk

Julie Maddocks will talk to transport team - no probs anticipated

Wkly conversations to ensure okay

LB to spk to **I&S**

to D. Each mother is an individual & when shd delivery be done.
→ this is a concern

TC Principle → comms. to mums. Must be explicit - not risk
averse but need to be clear.

Julie F. Each woman needs individually to be assessed

Steve B. Cannot reduce risk 100%

TC. Incredible upheaval for 2 deliveries. No's. low.

Need to plan to find unit appropriately

Duncan Do we copy Macclesfield - here 1 known risks

TC. Stabilisation - warehouses → ?

Lorraine. In-quick delivery & then to other unit?

to D. by 1 a wk.

Lorraine. Mum's view important.

TC Clinical model getting there.

Lorraine b. Spec. Care. 4 transition beds. 3 ITU 2 HDU.

Revisits. to A2 1b.

From is. SC. & 1 stabilisation. 4 transition (upstairs)
Wed. 2 HDU beds.

Comms - Who spks to families of babies in level 2 coln.

→ Steve B. happy to do this. Safety is about security of babies

Lorraine. Just talk about the one element of the unit.

TC Work out lines bet ITU & HDU!
