

## Paediatrics Meeting 27<sup>th</sup> March 2017 – 5.10pm – 6.20pm

<u>Attendees</u>			Sue Hodkinson (SH)	
Tony Chambers (TC)		Ian Harvey (IH) Steve Brearey (SB)	Julie Maddocks (JM)	
Ravi Jayara		Sleve Diealey (OD)		
Nim Subhedar (NS)				
TC Welcomed everyone to the meeting. Provide some context of the current				
<ul> <li>position. We've had:</li> <li>1. Royal College Review – actions and recommendations</li> <li>2. Members of Staff – grievance</li> <li>3. Clinical, how we get to the point the Board and Organisation has done</li> </ul>				
~	everything to answ to do to get to this	point?	that point, what do we need	
	RJ/SB/NS/John Gibbs – we had a useful meeting were we reviewed the 13 deaths.			
There There to res IH co notes	There were five everyone was comfortable with. There were eight were there were still concerns either cause of collapse, failure to respond to resus. Further in-depth review, which focused on collapses. IH completed reviews of the eight and review of rotas together with all case notes and what recorded in the notes.			
It was	The next stage was to go through these It was important that we were conscious of deaths in the first instance. This would drive anything regarding babies collapsed. There are a number of questions we need help with: - Collapsed unexpectedly, fail to respond			
-	If looking at poter how this is unpick	ntial causes, continuing co	onsequences of collapses and	
Focus It is d A fur	ther 6 babies, arres hese have been inv	ansferred babies opth that this has been gor sted unexpectedly, which vestigated in depth.	we identified in July. We don't	
This	months on and the needs to escalate t lated this in July.	hospital should not invest to the police. We have no	t had any explanation and we	
	Why are you escalating this now?			
		I. There is no natural caus	e of death.	
	e have been deaths			
		able. Not included in morta		
TC You	don't believe the di	fferent admission criteria h	had an impact?	

R	As a group of pagdiatrician	
	<ul> <li>J As a group of paediatricians, we accept the Royal College review, the case note review and Jane Howden's review identified further ones.</li> <li>It's a difficult thing, what level of review do we need to do. We have a collective view that this now needs to be at the level of a rota review, who, where involved, a forensic investigation.</li> <li>We accept that we may not find cause.</li> <li>We have our names on the end of the incubator, we need more assurance.</li> <li>The interpretation of the reports differs to the Board.</li> <li>We were presented with a plan and we have explored every avenue with the BMA (British Medical Association).</li> </ul>	
ТС	C The review identified that there was no single casual factor, you ident further cases. What do you agree and don't agree on?	
SB	Jane Horden – four cases forensic review, her review was not forensic, it stimulated discussion and learning. There are four cases not reviewed yet.	
TC	If this is your intention this is always going to continue, only higher authority is the police, not sure what they will say?	
NS	The cluster caused concern here. The College review is a service review not case note and followed up with further detail review. In depth review for more than four cases. The standard needs to be external to be some degree.	
TC	I need to know if we do an individual case note review, or phone the police.	
JM	Given the information, on the balance of probability, illegal activity has caused the deaths.	
IH	Or reasonable doubt?	
ТС	If no process, the determining factor is that there is no other answer Mischievous activity is the only causal factor. I didn't think that was where we are. We can phone them now, everyone will be interviewed.	
SB	The worries not going away. I'll share with you an email from one of experienced consultants, who was new with us in July; he has some strong feelings than me. Quotes e-mail (from Michael).	
TC	If that is where we are, then phone the police. You can call the police.	
RJ	After the case note review, we are still left with 8 cases.	
NS	Left missing staffing data, if that is reassuring.	
IH	Does not highlight a single individual?	

. .
