Subject: Meeting with paediatric consultants - 16 April

Dear Tony and Ian
I have reported back fully, albeit succinctly on Monday's meeting and expanded verbally to you Tony and to Stephen.
This email follows up on the next steps/actions, which were discussed:-

In the collective spirit of seeking to rebuild positive professional relationships based on mutual trust and respect, the following matters should be developed urgently together as the first steps forward:-

- Full, timely involvement and effective communication with paediatricians in issues of concern and interest to them, whether internally, externally or with the media.
- Discussion of the 32 week transfer out policy in the context of appropriate clinical risk management and of any other outstanding risk management issues. This will involve a shared understanding of any external body constraints e.g. Police, CCG to returning the Neonatal Unit to Level 2 status.
- Shared transparency of what information was communicated to the parents of the babies who died.

Every appropriate opportunity should be taken at the seniormost levels to develop joint strategic positions and communications around the major strengths/weaknesses and threats/opportunities, facing us re

N Wales, West Cheshire and Wirral services for Women and Children.
The role of the NED champion for Women and Children should be reviewed.

If you feel that I could be helpful at any time going forward, please don't hesitate.

Ravi, helpful if you would forward to colleagues.
