Subject: NNU concerns

Dear all,

Thanks for meeting with Ian and I at such short notice this afternoon to further discuss concerns raised by consultant colleagues at their lunchtime meeting. Following our discussion we agreed the following actions:

- Microbiology/infection control review to be undertaken within the NNU - IH to approach Sam Walker and Jeremy Gardner/Ildeko to undertake this. ? To undertake Deep Clean of the unit. IP&C Team to meet with EP to arrange
- IH & AK to meet with Consultant group re their concerns - DD to liaise with Ravi and team to arrange
- EP to be mindful of staff allocation during shifts re LL to provide support, supervision etc.
- IH to identify Royal College Lead to facilitate External NNU review (multi disciplinary)
- EP to check Datix submitted from the unit, AK to also request a Datix report from Ruth Millward re recent NNU submissions to identify any trends
- AK to contact NMC Professional support line to gain any further professional advice re current situation
- LL to remain on days for support, on Annual leave next week. EP, IH, AK, KR & AM to undertake a review of actions on Friday 1st July
- EP arranging de-brief for unit staff this week following recent deaths x 2, usual practice for the unit in these circumstances.
Eirian, just wondering who will be in attendance at this meeting- need to consider this in light of staff involved and current allegations
- Mortality reviews to be undertaken next week (as usual in these circumstances)
- *Eirian, can you also review staff competences re skills and knowledge to support sick babies of varying levels of dependency. I know you will have this but would be good to undertake a review.*

We will get a time in the diary for Friday, thanks again for your support in the above

Regards, Alison
