 to IH. to h.v. a phone call with Jane Howdon.
 → Ruth has pulled together all that went to Reviewers
 → IH. has been thro 7 sets of notes as suggested by
 Nim of the network.

to no. where there was another nurse.

• Presentation - Ruth/Siân.

Accuracy graphs - fed into Para's in L. IH

More detail on staffing for each case. IH.

Probabilistic statistic for Lucy (P/T vs F/T) IH.

TC. Culture on unit at time.

• Everyone complicit to protect status of unit.

• Trying to cope Docs & Nurses.

• Presumably felt unit under threat.

• No's - over activity

• Delayed transfer - heroic endeavour.

• Lack of confidence in transport service - network

• Better we do - the unit will continue/survive

• Wrong things for right reason - causal factor.

• Now compromised on how Docs. feel.

• IH concerned that unit at time not safe for babies
 & not recognised by Docs.

• Data/gaps now filled - does not support one single
 causal factor. ie. Nurse criminal activity

• What is story?

→ IH. after data + recent baby death coming
 from our unit & delayed transfer out to Bolton
 + baby death list (to Howdon 11 Feb)

• Now need narrative/story around presentation from
 Siân/Ruth.

- TC. Concern from TC. talking to Nurses on unit who felt transfers were inappropriate/unfair to families. Dark side of countless culture. Need to re-profile group think of Docs. Unit safe or not? Leadership - parachute leaders in!
- LB. This am - Lucy distressed yesterday CWP mediator not available to Lucy finish shift today. To her father. To GMC?
- TC. if it 'blows' - yes. We have followed a measured line. Coroner - 2pm. (IH & SPE) TC. to respond to clinicians. (DRAFT)
- ↳ share additional comments from College re: Lucy in response to clinicians.
