18/08/2017 (Dec 2016 – April 2017)	Clinical observation at Alder Hey Children's NHS Foundation Trust	<p>For a period of 4 months Lucy has been attending Alder Hey Children's Hospital in order to experience the breadth of secondary and tertiary paediatric services provided.</p> <p>Lucy has observed General Paediatric outpatient and diabetes Clinics. She has observed renal dialysis and been taught about peritoneal dialysis, as well as sitting in on a complex discharge planning meeting.</p> <p>Lucy has spent a day observing nursing practice on the Paediatric Intensive care Unit.</p> <p>All of the teams that participated in offering the sessions to Lucy have commented on how keen she has been to acquire new skills and to gain knowledge experience outside of her normal working field.</p>
---	---	--

I have worked with Lucy between September 2015 and September 2016 on the CoCH Neonatal Unit. We have worked together on babies with acute admissions, labour ward transfers and a range of gestations from 26-40 weeks.

30/06/2016	Observation of <i>Team work /Challenging situation</i>	<p>Lucy responds to challenging situations by prioritising and identifying immediate clinical needs. Lucy works well independently and as part of a team, she clearly identifies problems requiring immediate intervention and selects the appropriate member of staff to facilitate this.</p> <p>Lucy has good rapport with all team members including auxiliary, nursing and medical staff.</p> <p>Observation of Lucy's work during a challenging situation demonstrated a professional attitude and preemptive thinking in order to facilitate anticipated clinical needs. Lucy quickly identified a deteriorating clinical scenario, she promptly asked for support from both nursing and medical teams and was responsible for as quick as possible intervention in order to stabilise her patient.</p> <p>Lucy clearly demonstrates excellent Intensive care Nursing skills which I feel could lead her towards an advanced neonatal nurse practitioner role in the future.</p>
