Subject: Case note reviews

Dear Ian,

I have been thinking about the upcoming case note review. As I have gone through these cases a number of times already, I just needed to point out that providing just the case notes to the reviewers will not be enough for them to review the care fully.

All the nurse records are entered onto Meditech so presumably will need to be printed off one at a time. All entries are under "Patient care notes"

In addition the reviewers will need access to Badgernet.

Some of the Xrays are also quite important in some of the cases, but I'm sure you have thought of this already.

Please let me know if I can be of any help.

Steve
