

14. In recording *"Was in April + looking at it now"*, I believe Mr Cross is referencing the four cases identified by the Consultant Paediatricians, as referenced in the position paper and described at paragraph 10 above.
15. With regards to Mr Cross' entry *"Risk register – W+C's structure (governance) before escalation elsewhere (see risks)"*, I do not recall any discussion in relation to the risk register for the Neonatal Unit. I note that Mrs Kelly has made a similar entry in her notes of the meeting [INQ0006021]. The addition of a Women and Childrens Governance Board to the governance assurance and reporting structure was well known to the Executive Team at that time, as the minutes were received at the monthly Quality, Safety and Patient Experience Committee (QSPEC). I can confirm that, at or around the time of the meeting, Mrs Kelly requested an overview of the Neonatal Unit risk register to be included within the Position Paper. This was included at page 10 [INQ0003492].
16. Mr Cross' handwritten notes also state *"SUMMARY (RUTH) Concerned witch hunt for Nurse / But F/Time + addit hrs means she is on duty more / Will get known outcomes / Closed culture in Dept / Concerned re learning / Do not know why this is happening"*. I do not recall this discussion taking place, which appears to be attributed to myself. I recognise some of the wording, specifically around concerns of a witch hunt for the nurse and her working hours, as from discussions with Mrs Eirian Powell, Ward Manager. Mrs Kelly has made a similar entry regarding Letby's working hours in her notes of the meeting [INQ0006021]. Regrettably, I cannot assist the Inquiry further with this.
17. From Mr Cross' notes, I can see that he has attributed the following points to himself *"SPC Emails from consultants"* and *"SB -> targeting one individual"*. SPC is Mr Cross' initials. I have no recollection of this discussion. I do not believe that I was present at the meeting at this time.
18. From Mr Cross' notes, I can see that he has attributed the following to Ms Lorraine Burnett, Director of Operations, *"David Semple sd if SB has a concern 'I believe him.'" LB is Ms Burnett's initials. I have no recollection of this discussion. I do not believe that I was present at the meeting this time.*
19. Mr Cross' handwritten notes also state *"RM Is there stuff we do not know? / Something somewhere is WRONG / Each case needs independent deep dive."* I do not recall this discussion taking place, which appears to be attributed to myself. However, this seems to correspond with paragraph 10 above in relation to the additional four cases identified by
